

Golf Scorecard and GPS App

MiScore provides Australian golfers with a method of digital scoring for Stableford, Par, or Stroke competitions. Login to your home club and submit gross scores as a marker while tracking your pace of play and viewing GPS distance from the pin.

Automated Score Tally

Save time with an automated score tally. Players enter gross scores and MiScore will calculate results based on handicap and course index.

GPS Distance Measuring

View distance to the pin from the score entry screen. Drop a pin anywhere on the GPS map to view the distance in metres from your current position.

Pace of Play Management

Track pace of play with a helpful in-app countdown timer. When scoring the round, players will be able to monitor their play speed to avoid frustrating delays.

Digital scoring method approved by Golf Australia and R&A.

A better way to keep score

MiScore is an approved scoring method aligned with the 2019 rules of golf. To use the MiScore app for competition scoring, you need a valid membership with an Australian Golf Club using MiClub golf management software.

Download MiScore on the App Store or Google Play Store. Add your home club and login using your membership username and password. To begin using the app in competition, simply select a playing partner in your group to mark for and then continue to score entry.

Score by applying a gross score value for each hole before swiping to the next. Enjoy scoring features like GPS distance measuring and pace of play round timer. When all values are entered, validate the player scores with digital signature and submit for verification.

Competition leaderboards and results are readily available in-app after competitions.
